

Vinay B K

(Senior Java Developer – Microservices)

Contact No: +91 9739480529

Email: vinay087@gmail.com

Brief: An action-oriented and result focused IT professional with 18+ Years of technology expertise in development of **Java based Applications** with comprehensive domain knowledge in **Banking and telecom**.

Professional Experience:

Oct-2011 to till date - **Tata Consultancy Services** (Assistant Consultant)
Mar- 2010 to Oct-2011 - **Wipro** (Senior Software Engineer)
Jul – 2006 to Feb-2010 - **Mahindra Satyam** (Software Engineer)

AREAS OF EXPERTISE	PROFILE HIGHLIGHTS
✓ Core Java, Multithreading ✓ Spring Framework, Spring MVC, Spring Data, Spring Boot ✓ Microservices ✓ Hibernate/JPA ✓ Cloud ✓ WebSphere, Tomcat ✓ Open Shift ✓ Kafka ✓ Oracle, MySQL, MongoDB ✓ REST Web Services, SOAP UI ✓ JUnit, JMeter ✓ Agile Methodology & Waterfall ✓ Git, Azure ✓ Maven, Jenkins	• Have played multiple roles- developer, team lead, technical analyst and technical lead. • 3 years of onshore experience, including direct client interactions, requirement gathering, and coordination. • Experienced in both individual and team-based development work. • Adaptable and flexible in taking on diverse roles based on project needs. • Quick self-learner with a strong drive to explore and adopt new technologies. • Technical analysis for requirement, HLD document preparation. • Database knowledge on data model design and implementation. Existing query optimization. • Troubleshooting production issue. • Effective team player with excellent analytical, problem-solving, planning, communication, and interpersonal skills. • Experience in coaching and mentoring team members to enhance skills and overall team performance. • Familiar with onshore-offshore delivery models and global team coordination. • Contributed to multiple end-to-end project lifecycles, from inception to delivery. • Experienced in managing communication across teams, clients, and multiple vendors. • Basic knowledge of Cloud services and concepts. Academics : B.E.- Dayananda Sagar College of Engineering, Bangalore Languages : English, Hindi, Kannada

PROJECTS

1. Mortgages – Belgium

Client: ING Belgium

Technologies: Java, Spring Boot, Oracle, Azure, Git, JMeter, Prometheus, Grafana

Responsibilities & Achievements:

- Conducted detailed requirement and impact analysis, ensuring seamless integration with existing mortgage processing modules.
- Designed and implemented scalable, cloud-ready microservices aligned with ING's enterprise architecture and development standards.
- Developed RESTful microservices using Spring Boot and Java, leveraging ING frameworks for consistency and performance.
- Built comprehensive unit and integration test suites, improving code reliability and reducing production defects.
- Implemented and managed CI/CD pipelines to automate build, test, and deployment processes across environments.
- Coordinated release planning and deployment across multiple dependent teams, ensuring smooth production rollouts.
- Maintained Git branching strategies, ensuring release stability and proper version control practices.
- Deployed applications to lower environments and supported end-to-end system validation.
- Performed performance and load testing using JMeter, optimizing service response times to meet SLA benchmarks.
- Integrated Prometheus and Grafana dashboards for real-time monitoring, enhancing observability and proactive issue resolution.

2. iServices

Client: Cisco, Bangalore

Technologies: Java, Spring Framework, Spring Boot, Oracle, SOAP, Jenkins, Splunk

Responsibilities & Achievements:

- Analyzed functional requirements and designed SOAP-based web services aligned with Cisco's enterprise architecture.
 - Developed robust web services using Spring Boot and Spring Web Services, implementing XML-based communication standards.
 - Implemented data marshalling/unmarshalling using Jackson APIs, ensuring efficient message transformations.
 - Validated XML payloads against WSDL/XSD schemas, ensuring strict contract compliance.
 - Designed and maintained Jenkins CI/CD pipelines, enabling automated deployment and faster delivery cycles.
 - Developed and executed unit and integration tests, improving service reliability and reducing defect leakage.
 - Conducted end-to-end testing in lower environments, identifying and resolving system-level issues.
 - Built Splunk dashboards for centralized log monitoring and faster troubleshooting of production issues.
 - Collaborated closely with QA teams to ensure high-quality deliverables and defect resolution.
-

3. CSL & CRR Applications for LTE MBB

Client: Nokia Siemens Networks, Bangalore

Technologies: Java, Spring Framework, MySQL, Unix

Responsibilities & Achievements:

- Performed detailed requirement analysis and contributed to design and development of LTE mobile broadband applications.
- Developed backend components using Java and Spring Framework, ensuring modular and maintainable code.
- Created Unix shell scripts to automate deployment and operational tasks.
- Managed build and deployment processes, ensuring timely releases across environments.
- Participated in code reviews, improving code quality and adherence to standards.
- Executed unit testing, ensuring component-level reliability.

4. Network Planning Tool (NPT)

Client: Alcatel-Lucent, Bangalore

Technologies: Java, MySQL

Responsibilities & Achievements:

- Designed and developed core application features using Java, supporting network planning functionalities.
- Implemented efficient database interactions using MySQL for high-performance data handling.
- Participated in code reviews and release planning, ensuring stable and timely product releases.
- Developed and executed unit test cases, improving code quality and maintainability.

5. Network Inventory Common Element (NICE)

Client: TeliaSonera AB, Bangalore

Technologies: Java, Oracle, Struts, WebLogic

Responsibilities & Achievements:

- Designed and developed enterprise applications using Java and Struts framework.
- Wrote optimized SQL queries and stored procedures for data processing and retrieval.
- Integrated backend processes to support bulk data uploads, improving operational efficiency.
- Conducted code reviews and release planning, ensuring adherence to development standards.
- Performed unit testing and contributed to bug resolution activities.

6. SNMP Northbound Interface

Client: Harris Stratex Networks, Bangalore

Technologies: Java, Oracle

Responsibilities & Achievements:

- Designed and developed SNMP-based integration components using Java.
 - Built and maintained deployment scripts, improving release efficiency.
 - Conducted performance testing, identifying bottlenecks and optimizing system performance.
 - Participated in release planning and code reviews, ensuring high-quality deliverables.
 - Developed and executed unit test cases for system stability.
-

7. myPage – Personalization

Client: Apple Inc., Bangalore

Technologies: Java, Oracle, JBoss Portal, Struts, JSP, jQuery

Responsibilities & Achievements:

- Developed personalization features using Java-based web technologies within the JBoss Portal framework.
- Built dynamic web pages using JSP, jQuery, and front-end scripting technologies.
- Participated in code reviews and release planning, ensuring timely feature delivery.
- Performed unit testing and bug fixing, improving user experience and platform stability.
